PROFILE

A power systems engineer, switching into the world of web development. Just about 12 months experience in web development perfecting smooth and efficient coding skills. I enjoy creating beautiful, user-friendly and responsive websites. I function well alone, with little or no supervision and even better in a team of like-minded members. I put to good use analytical and problem-solving skills acquired over the years, to give desired outcome for clients, users and employers.

WORK EXPERIENCE

Distribution Systems Engineer

2018 - 2024

IKEJA ELECTRIC

- Inspect, operate and maintain sub-station and distribution apparatus consistent with company policies and regulations
- Displayed solid technical writing, verbal communication and presentation skills.
- Responsible for timely reporting of operations and other reports as required.
- Analyzing problems to determine type of repairs necessary and informing appropriate personnel.
- Communicated with all levels of management effectively, giving reports and presentations.
- Maintained daily operating log on all operations, both routine and emergency and reports on line outages and weather conditions.
- Noted changes in load and make routine adjustments to meet such changes without immediate supervision. .
